President' s Address for Graduation Ceremony 2014

Congratulations everybody!

I am delighted to give a congratulatory address on your graduation from the Special Program for International Students in the Interdisciplinary Graduate School of Science and Engineering and the Graduate School of Life and Environmental Science of Shimane University.

You got not only new knowledge of your specialty but big global power because you completed hard work in Shimane University curriculum despite you may have many difficulties with Japanese language and customs.

I believe you learned many things in addition to school works from your Japanese friends.

Today, the world is getting narrow, and wave of globalization is spreading very rapidly. There are no boundaries especially in your scientific world. Therefore, I hope you will achieve great accomplishments that will be recognized worldwide and contribute to humankind in your field. I also hope you will play an important role to continue good relationship between your country and Japan using knowledge you studied here.

We are promoting international exchange program, because global sense become more important now. We are making effort to increase foreign students and develop new international exchange. I want to ask you to recommend our university to your colleagues and students who wanting to come to Japan.

I believe all of you should be powerful and active key person in your field after comeback to your country, and to be continued our friends.

My best wishes for your future! Congratulations again!
